

Persistence and Retention Rates

January 2023

BACKGROUND

Key Performance Indicators (KPI)

Rock Valley College (RVC) has identified KPI to inform the college community about institutional health and development. The College KPI are presented in five categories aligned to Illinois Board of Higher Education (IBHE) Public Agenda Goals. College KPI categories include *Educational Attainment, Access, and Success; Affordability; Educational Quality; Accountability; and Addressing Regional Economic Needs.*

Persistence and Retention Rates are KPI aligned to the College category of *Educational Attainment, Access, and Success*, as well as the category of *Educational Quality*. As a measure of *Educational Attainment*, this category is aligned to the IBHE Public Agenda Goal to raise the number of people with postsecondary credentials and improve transitions along the educational pipeline. As a measure of *Educational Quality*, this category is also aligned to the IBHE Public agenda goal to improve transitions along the educational pipeline.

Persistence and Retention Rate Data

Persistence Rate is defined as the percent of students enrolling in consecutive fall and spring terms (e.g., Fall 2021 and Spring 2022). Retention Rate is defined as the percent of students enrolling in consecutive fall terms (e.g., Fall 2021 and Fall 2022). Both rates are calculated by dividing the number of students enrolled in both terms by the number of students enrolled in term one, less completers who subsequently left the college. These completers are not included in the calculation because they have achieved their community college goal and are not expected to return for subsequent terms. Data to inform this report were pulled from the College's student database (Colleague) and are based on enrollment as of the 14th day of each term. Comparison data are from the National Center for Education Statistics' (NCES) Integrated Postsecondary Education Data System (IPEDS).

RESULTS

Persistence

Table 1 represents the persistence rates for RVC students overall and disaggregated by demographic subgroups, including enrollment status (full time or part time), gender, race/ethnicity, and age (traditional or nontraditional).

Table 1: RVC Student Persistence Rates by Various Demographic Groups (Fall-to-Spring - %)

Fiscal Year:	FY18 (Fall 2017)	FY19 (Fall 2018)	FY20 (Fall 2019)	FY21 (Fall 2020)	FY22 (Fall 2021)	Change (FY18- FY22)
Overall	73.4	72.8	73.0	71.5	70.5	-2.9
Status¹						
Full time	86.9	85.8	84.0	83.8	81.5	-5.4
Part time	63.3	62.8	63.6	61.9	61.3	-2.0
Gender						
Male	72.8	73.7	71.1	70.9	70.6	-2.2
Female	73.8	72.2	74.5	71.8	70.4	-3.4
Race/Ethnicity						
American Indian / Alaska Native	60.8	55.6	71.7	66.0	58.1	-2.7
Asian	78.8	81.0	81.1	73.8	70.6	-8.2
Black / African American	62.8	59.5	59.8	58.9	55.7	-7.1
Hispanic / Latino	73.0	70.6	71.2	68.5	69.8	-3.2
Native Hawaiian / Other Pacific Islander	*	*	*	*	*	--
White	74.6	74.9	74.9	74.8	73.2	-1.4
Age²						
Traditional	75.1	75.4	74.8	75.1	72.6	-2.5
Nontraditional	67.2	67.0	66.0	65.2	63.8	-3.4

Source: Office of Institutional Research Persistence Application

*Percentages are not reported for group sizes of 30 or less

Over the past five years, overall fall to spring persistence has dropped 2.9% from 73.4% to 70.5%. Disaggregated persistence rate data in Table 1 suggest:

Enrollment Status

- Full-time students consistently persist at a higher rate than part-time students.
- Persistence rates have decreased for full-time students over the five-year period reported.
- Persistence rate for part-time students have decreased over the same time period.

Gender

- Female and Male persistence rates have decreased since FY2018.

Race/Ethnicity

- The persistence rate of Black/African American students decreased by 7.1 percentage points over the five-year period reported.
- The persistence rate of Hispanic/Latino students decreased by 3.2 percentage points over the five-year period.
- The persistence rate of Asian students has decreased 8.2 percentage points to the lowest level in the five-year period.

Age

- Traditional students consistently persist at a higher rate than nontraditional students.

¹ Full-time students are enrolled in 12 credits or more, and part-time students are enrolled in less than 12 credit hours.

² Traditional students are age 24 and younger, and nontraditional students are over the age of 24.

Retention

Table 2 represents the first-time student retention rates for students at RVC and comparison Illinois community colleges. As such, the percentage of first-time, full-time and first-time, part-time students enrolling in consecutive fall terms are provided. Data within Table 2 characterize first-time students as defined by IPEDS³. RVC data suggest:

- First-time, full-time students are consistently retained at a higher rate than first-time, part-time students.
- Over the past five years, retention rates have ranged between 64% and 70% for first-time, full-time students and between 42% and 47% for first-time, part-time students.
- RVC consistently has retention rates at or above the peer average for full-time students. Part-time students averaged lower than their peers for the first time in the five-year period.

Table 2: Multiyear Comparison of Retention Rates (Fall-to-Fall - %) of First-time Students: RVC and Comparison Illinois Community Colleges

Entering Cohort:	FY17 (Fall 2016)		FY18 (Fall 2017)		FY19 (Fall 2018)		FY20 (Fall 2019)		FY21 (Fall 2020)	
	Retained:		FY18 (Fall 2017)		FY19 (Fall 2018)		FY20 (Fall 2019)		FY21 (Fall 2020)	
Status:	FT	PT	FT	PT	FT	PT	FT	PT	FT	PT

Source: IPEDS Data Center

Table 3 represents the retention rates for all RVC students, including those who are not classified as first-time students. As such, the rates represent all students enrolling in consecutive fall terms. Table 3 also disaggregates the same data by subgroups, including enrollment status (full time or part time), gender, race/ethnicity, and age (traditional or nontraditional).

³ A first-time student is one "who has no prior postsecondary experience (except as noted below) attending any institution for the first time at the undergraduate level. This includes students enrolled in academic or occupational programs. It also includes students enrolled in the fall term who attend college for the first time in the prior summer term, and students who entered with advanced standing (college credits earned before graduation from high school)."

Table 3: RVC Student Retention Rates by Various Demographic Groups (Fall-to-Fall - %)

Fiscal Year:	FY18 (Fall 2017)	FY19 (Fall 2018)	FY20 (Fall 2019)	FY21 (Fall 2020)	FY22 (Fall 2021)	Change (FY17-FY21)
Overall	54.3	54.8	51.1	50.8	52.3	-2.0
Status⁴						
Full time	63.2	65.5	61.0	60.0	61.6	-1.6
Part time	48.1	47.1	43.3	44.1	45.3	-2.8
Gender						
Male	52.3	54.8	48.1	49.8	53.0	0.7
Female	56.0	54.8	53.6	51.6	51.8	-4.2
Race/Ethnicity						
American Indian / Alaska Native	44.9	28.6	56.8	43.9	43.6	-1.3
Asian	56.3	64.6	61.5	55.1	52.1	-4.2
Black / African American	46.6	45.2	39.5	41.9	37.4	-9.2
Hispanic / Latino	55.5	58.1	53.2	54.6	55.1	-0.4

Age⁵						
Traditional	55.7	56.9	52.4	52.6	54.0	-1.7
Nontraditional	50.0	48.5	47.2	45.2	47.0	-3.0

Source: Office of Institutional Research Retention Application

*Percentages are not reported for group sizes of 30 or less

Over the past five years, fall to fall overall retention has a decreased of 2.0 percent. Disaggregated retention rate data in Table 3 suggest:

Enrollment Status

- Full-time students are consistently retained at a higher rate than part-time students.
- Full-time and Part-time Retention rates have demonstrated a decrease of 1.6 and 2.8 percent respectively over the five-year period reported.

Gender

- Retention rates for female students have decreased 4.2 percent over the five-year period. Retention rates for male students has 0.7 percent increase over the five-year period.

Race/Ethnicity

- All Race/Ethnicity have decreased over the five-year period.
- Black/African American students have decreased to the lowest rate over the five-year period at 37.4 percent.
- Hispanic students have been retained at a higher rate than white students over the five year period.

⁴ Full-time students are enrolled in 12 credits or more, and part-time students are enrolled in less than 12 credit hours.

⁵ Traditional students are age 24 and younger, and nontraditional students are over the age of 24.

Age

- Traditional-age students are consistently retained at a higher rate than their nontraditional peers.
- Retention rates for nontraditional and traditional students have decreased over the past five years.

FINDINGS AND CONCLUSIONS

Persistence and retention are examined as institutional KPI which provide information about the College’s efforts in the areas of *Educational Attainment, Access, and Success* and *Educational Quality*. Specifically, data within this summary report support decision making about efforts to raise success and improve transitions within the educational pipeline, as well as eliminate achievement gaps. The pandemic appears to have caused a disruption in retention. The data in this report suggest the following about these two areas:

Raising Success and Improving Transitions within the Educational Pipeline

Raising success and improving transitions within the educational pipeline would be determined by persistence and retention rates that reflect students’ successful completion of courses and progress toward educational goals. The minimum expectation of persistence and retention rates would be that they would increase over time.

Data in this report indicate a decrease to the lowest level in the five-year period in the overall persistence rate, indicating that the College has not maintained its capacity to re-enroll students from fall to spring. Data indicate an overall decrease in retention rate from FY2018 to FY2022, indicating that the College has not improved its capacity to re-enroll students from fall to fall. Further improvements in persistence and retention for all students would enhance students’ movement through the educational pipeline to graduation, transfer, or other goal completion.

Figure 1: Current Results on Raising Success within the Education Pipeline

Eliminating Achievement Gaps

Eliminating achievement gaps would be determined by persistence and retention rates that reflect successful progress toward educational goals for all students. As such, the minimum expectation is that gaps in persistence and retention rates between subgroups will narrow over time.

The achievement gap between Black/African American and White students have demonstrated an increase over the five year period for retention. The persistence and retention gap between Hispanic/Latino and Black/African American peers has increased over the five-year period. Hispanic/Latino students' retention is typically higher than White students.

Figure 2: Current Results on Eliminating Achievement Gaps

	Persistence	Retention
Race/Ethnicity		
<i>Black/African-American and White</i>	↑	↑
<i>Black/African and Hispanic/Latino</i>	↑	↑
<i>Hispanic/Latino and White</i>	↑	NA*

Expectation: ↓
Decrease achievement gaps over time

*Hispanic students are retained at a higher rate than white students.
